

SummerCryo7 Chiller

The Summer Cryo7 Chiller offers clear and easy operation via a capacitive touch screen. The SummerCryo7 Chiller is intended to minimize a patient's pain and injury during laser and dermatological treatments and for temporary topical anesthetic relief from injections. Top platform provides a large usable area for a laser, IPL, or accessories. An optional articulating arm facilitates hands-free operation.

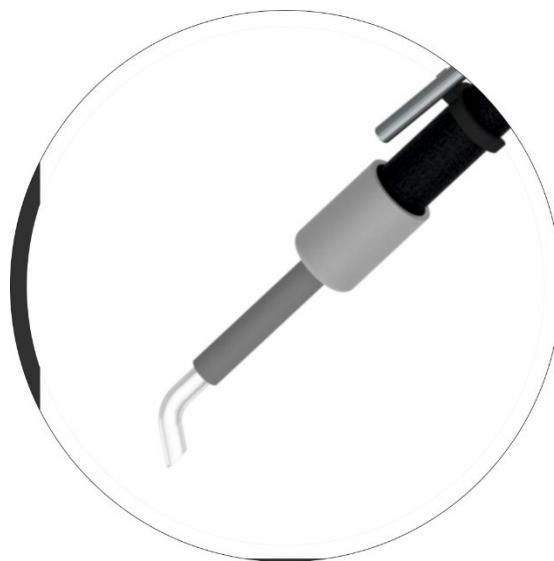

The Cold Air Device with innovative functions

The SummerCryo7 Chiller is intended to minimize pain and thermal injury during laser and dermatological treatments. It also provides temporary topical anesthetic relief during injections, tattoo application, tattoo removal, RF, laser hair removal and much more. The device can assist in a variety of applications and is particularly useful with cosmetic procedures. Unlike other cooling

methods, such as contact cooling, cryogen spray or ice packs, the Cryo7 can cool the epidermis before, during and after the laser energy has been applied, without interfering with the laser beam. The new design comes with NO Water Tank to empty. Internal evaporation tank evaporates the condensed water back to room ambient.

The Perfect System for Skin Cooling – Especially for Laser Treatments and Injections

The SummerCryo7 Chiller is the perfect chiller system for cooling the skin in laser applications and injections of any kind. The cold air device reduces the pain sustainably and minimizes thermal damage to the skin in laser and IPL applications. Studies have shown that skin cooling with the Cryo7 cold air device reduces patients' pain and sensitivity. As a result, treatments can be tolerated significantly better.

SummerCryo7 – the Best Choice

Professionals throughout the aesthetic industry use the Cryo7 extensively for varying cosmetic and dermatological laser treatments. The system streamlines the process, while ensuring optimum patient comfort and minimizing the risk of thermal injury. The cold air device facilitates aesthetic procedures with rapid and effective numbing for patients. For aesthetic laser practitioners, the Cryo7 is a fantastic addition to the operation theater, offering the best technology and the best choice for all sorts of aesthetic treatments.

SummerCryo7: Award Winning Technology

The Cryo7 maximizes comfort and minimizes side effects for patients, due to its unmatched cooling methods. Further characteristics acknowledged by the aesthetic industry are easy maintenance and service, convenient filter cleaning, defrost-cycle indicator and unique container for condensed water. The fact that Cryo7 has no consumables is well worth the highlight on its own.

SummerCryo7 Chiller Specifications

- **Delivers Cold Air Down To** -33°C
- **Power Supply** 220 V / 50 Hz
- **Max. Power Consumption During Therapy** 1,2 KW
- **Standby-Mode** 250 W / h
- **Cooling Duration** Non -Stop
- **Treatment Hose Length** 2mt.
- **Housing Dimensions** H 60cm / W 42cm / L 65cm
- **Weight** 55kg
- **Cooling Fans** max. 900 l / min
- **Device Class** Cosmetic Device CE Mark
